Cinema Studiov1.5

You can use Higgsfield Cinema Studio to generate cinematic scenes, and its camera presets help your ideas look like Hollywood-level productions.

Image

Video

Then you can turn those images into videos:

Upload image as a prompt or Describe the scene you imagine...

Movements

9:16

5s

Tilt up

Tilt down

Orbit around

Dolly in

Dolly out

Jib up

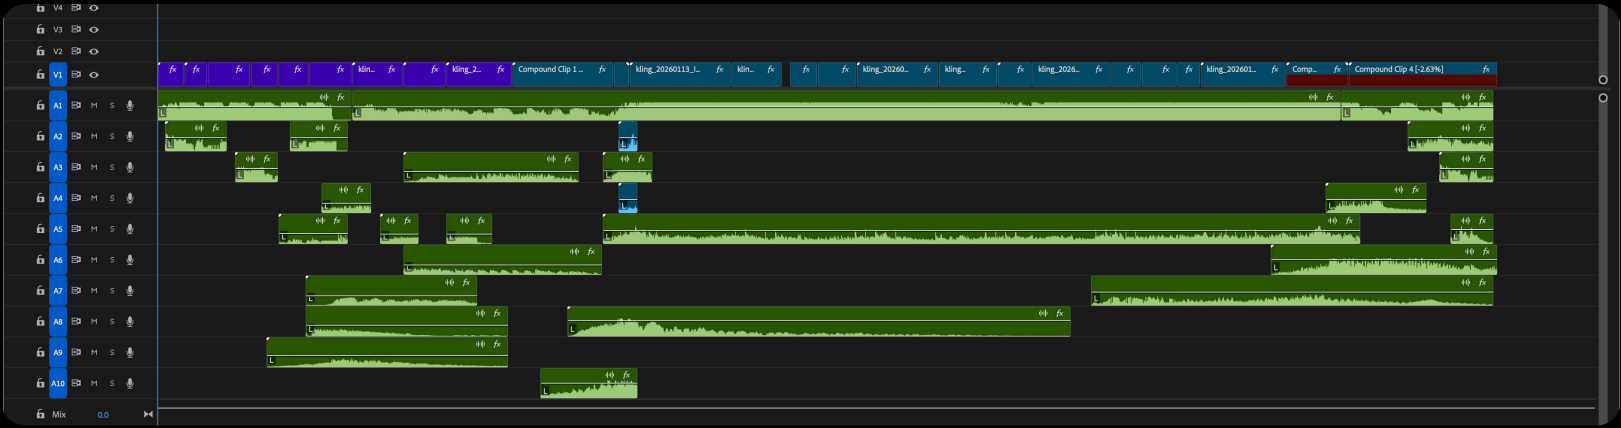

Jib down

Drone shot

Dolly left

Dolly right

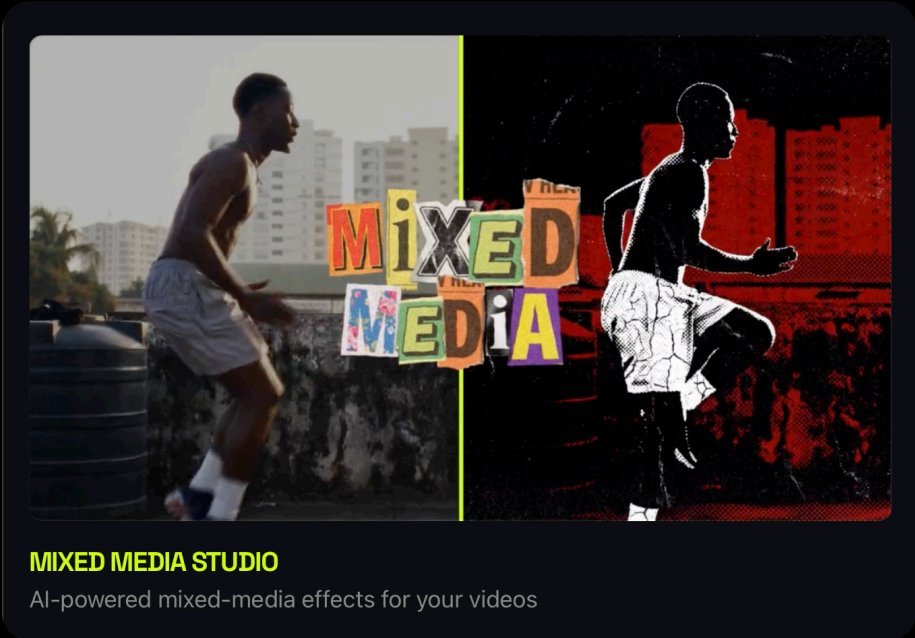

360 roll

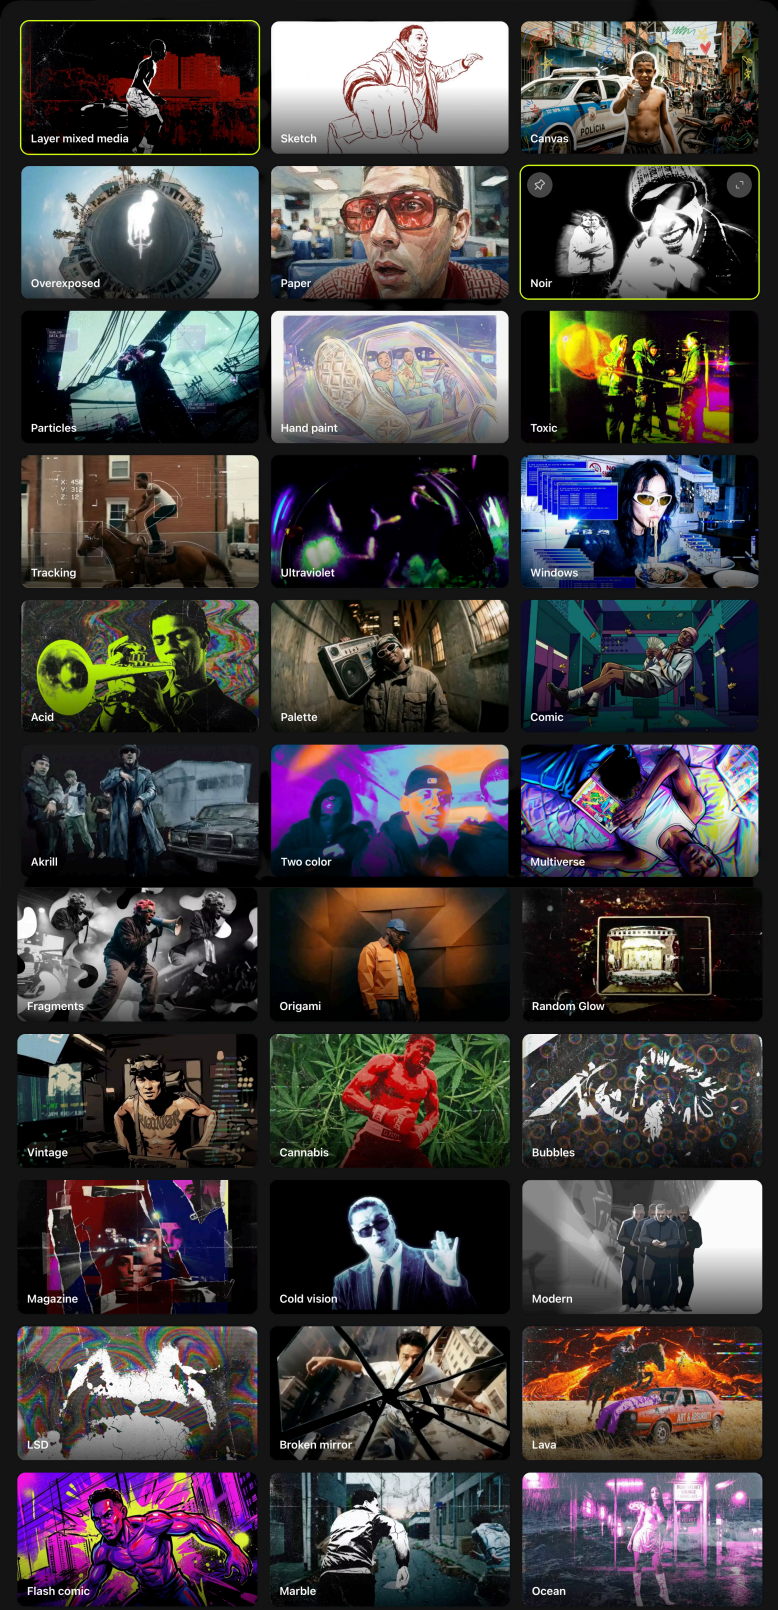

Once you have all your video generations, you can use a tool like Adobe Premiere Pro to cut your clips and make an edit.

Export

Then you export the whole edit, or just the parts you want to apply the mixed media effect to.

Go to [Higgsfield.ai](https://higgsfield.ai) and open Mixed Media Studio

Select your preferred Mixed Media Preset

Upload video to edit

Duration required: 1-10 seconds

Upload your video and
adjust the settings for the
selected preset

Generate ✨

Then hit generate!

Since our concept was about a tech product and going into a VR experience, we selected these three presets, which felt fitting for that style.

Here are the before and after results:

You can use multiple styles and play with them in video editing. Leave the original video on the first layer and add the mixed media videos on top, cutting them so they only appear at certain times, for example synced to the music.
