

Runway Gen-4.5

Runway's new text-to-video model offers unparalleled camera control, putting you in the director's chair for every generation. now with support for image-to-video

Workflow Overview:

- 1 For Runway Gen-4.5, you can generate videos that are 5s, 8s, or up to 10s long. You can use text-to-video, or image-to-video if you want full control over your output
- 2 Check out [Runway's Official User Guide](#) to understand the best practices for prompts.
- 3 You can share that user guide with your LLM of choice (ChatGPT, Gemini, etc.) then give it clear instructions of what you want to happen in the shot and get a perfect optimized prompt for Gen 4.5.
- 4 Get access to Runway Gen-4.5 with this link: **Runway Gen-4.5**
- 5 Add your input image, paste your optimized prompt, and hit generate!

Here are the video prompts we used , so you can recreate the same style of shots and workflow for yourself:

Prompt

Extreme low-angle tracking shot focusing on the man's cowboy boots as she walks towards the camera, kicking up dust as he walks

Camera Motion (prompted in the text)

LOW ANGLE

Output Video

Prompt

First-person POV locked to the dragonfly's head, flying at extreme speed through dense vegetation. Wings flap rapidly with heavy motion blur and vibration, strong wind pressure, sharp directional changes, and foliage rushing past with intense motion blur, creating a powerful sense of speed.

Camera Motion (prompted in the text)

FIXED

Output Video

Prompt

POV-locked chase camera following multiple mountain bikers descending steep dirt trails at high speed, positioned just behind and above the nearest rider with another biker ahead in frame. The riders carve through sharp turns and drops as dust and debris kick up, heavy peripheral motion blur emphasizes speed, and subtle camera vibrations convey impact and rough terrain.

Camera Motion (prompted in the text)

Output Video

Prompt

The camera punches in with a macro zoom, locking focus on her layered silver rings and thick wrist cuffs. Each metal surface catches ambient light, revealing scratches, etchings, and fingerprints — every detail dripping with character and story.

Camera Motion (prompted in the text)

Output Video

Prompt

The camera spirals rapidly around her in a tight orbit while dragging the shutter — every spin leaves a smear of neon and chrome, distorting her features and bending reality in brief, radiant flashes.

Camera Motion (prompted in the text)

Output Video

Prompt

A cinematic shot that transitions into a high-speed snap zoom. The camera begins by flying past the woman in a smooth motion, as it heads towards the distant skyscraper. Suddenly, the camera executes a cinematic snap zoom, rapidly magnifying the frame until it centers exclusively on a window high up in the building, revealing an old grey man hiding in the shadows.

Camera Motion (prompted in the text)

Output Video

Prompt

The camera zooms in close to her face, and then shifts focus to the barrel of her gun.

Camera Motion (prompted in the text)

Output Video
